

Elderhostel program to be held here

Thirty-five persons from across the United States will participate in Gallaudet College's first "Elderhostel" program on campus June 7-13. The Elderhostel network enables people over 60 to make new friends and pursue new learning experiences at any one of the 400 host institutions which make up this national network.

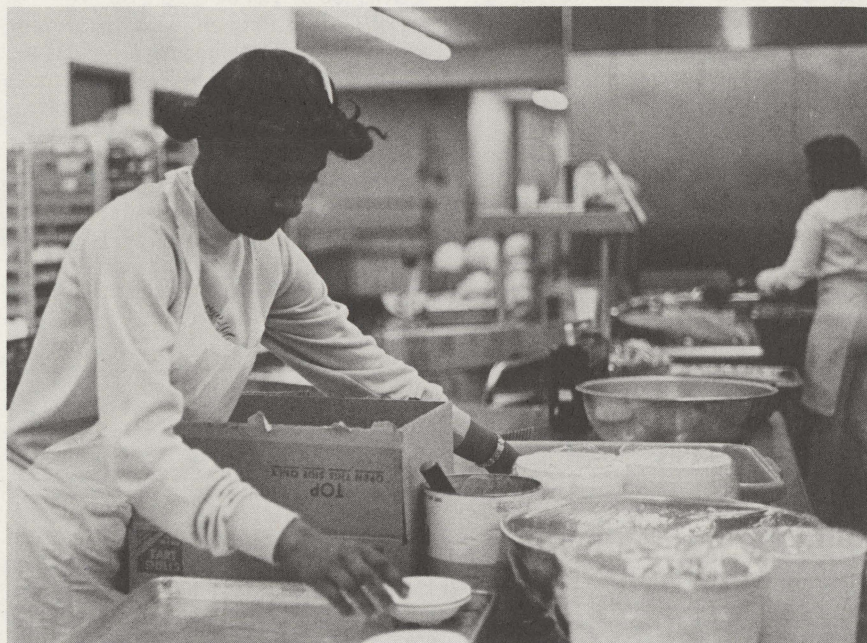

The Gallaudet Elderhostel Week is specially designed for the Elderhosteler who is experiencing hearing loss. Courses on adjustment to hearing loss and ways to improve communication will give the hearing impaired participants, their spouses and accompanying friends an opportunity to apply these techniques to their own lives.

The faculty for these courses are

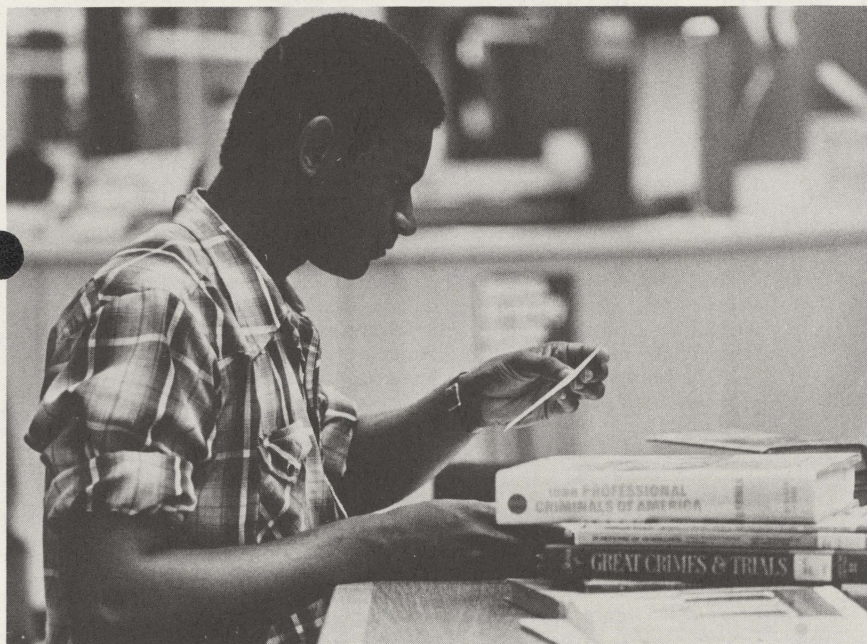

Patrick Cox, William McFarland and Teena Wax. For the third course, "Uniquely Our Own," Jack Gannon, Simon Carmel, Robert Seremeth and Janet Bailey are designing lectures, demonstrations and activities which will introduce the group to deaf culture and the deaf community. Dick Hoke is preparing a "hands on" exhibit of devices available for hearing impaired people.

The program idea was conceived by Regan Quinn who suggested it to Elderhostel.

Offered by the College of Continuing Education, the program is being coordinated by Loraine DiPietro, coordinator of Special Projects in the National Academy.

MSSD student Sherri Coates, above, works at Gallaudet's cafeteria, while, below, MSSD student John Borum gets experience at MSSD's Learning Resources Center.

Gallaudet College recently purchased this sculpture by Sir Jacob Epstein, "Deirdre With Slip," at a recent auction held in California. It was paid for by private College funds. The piece has been on loan to the College in the past from the Virginia Steele Scott Foundation.

MSSD students get "on the job" experience in job exploration course

By Pattie Cinelli

A group of MSSD students are receiving "on the job" experience and course credit for learning about different professions offered on Gallaudet's campus.

The eight students are enrolled in a modification of the career development course called "Job Exploration." According to Nancy Downey, a MSSD instructor and originator of the course, its' focus is to study different groups of jobs that are similar. For example, to learn about business in an office, students might work with a typist, a secretary, a receptionist or an administrative assistant.

Downey explains that there are eight job clusters to choose from, all of which are found easily on campus. During a semester a student might be "shadowing" a worker in three or four different places which can include food service, transportation, product services, personal services, construction, manufacturing, natural resources and environment (grounds crew) or business. Two days a week students study about these jobs in the classroom. The other three days they "shadow" a worker on campus.

"We provide students with the opportunity to see day-to-day activities of a worker on a specific job. It's one thing to talk about a person working in a grounds crew and show slides of his

work, but it's another thing to be with that person," explains Downey. However, Downey says the course is not geared to teach students a skill but to expose them to the tools and materials used and kinds of activities performed in a given job. Downey credits Marty Willigan, assistant director of Custodial and Grounds Services, with making her idea a reality. He encouraged all supervisors under his direction to take part in the program and allow students to 'shadow' their workers.

The course, which has been in existence since the fall, has provided positive experiences for both students and workers. "My kids love it. They find out the negative as well as the positive aspects of the jobs they shadow. They've worked in the MSSD, LRC, the Bookstore, the College cafeteria, in Central Receiving and general maintenance among others," says Downey.

Frank Callahan, Coordinator of material and contracts for Gallaudet Maintenance and Operations, agrees with Downey. "The kids we had working with us worked out terrifically." He pointed out that the students were not the only ones who benefited. "We got a chance to bone up on our sign language skills when the MSSD students shadowed with us. We want to help the kids learn what we do and to continue to be a part of the program."

Job Fair is first CARE activity

On April 30, the Capital Area Rehabilitation Educators (CARE) hosted its first annual Job Fair Workshop in rehabilitation counseling at Kendall Demonstration Elementary School.

Supported by a grant from the regional office of the Rehabilitation Services Administration, CARE is a consortium of educators from the rehabilitation counseling programs at Coppin State, Gallaudet College, George Washington University and the University of Maryland. Its purpose is to share resources and faculty expertise, and sponsor collaborative projects for graduate students and the rehabilitation community.

The Job Fair/Workshop was the first joint activity of CARE since its inception in November, 1980. Over 40 area rehabilitation agencies and organizations participated in booth presentations and on panels describing the state-federal rehabilitation program, rehabilitation with the physically handicapped, rehabilitation with the mentally handicapped and rehabilitation education.

Creative Contest

Although there were no local winners, this year's Creative Contest sponsored by *World Around You*, a publication of Gallaudet's Outreach Unit, was again a nationwide success, with more than 250 hearing impaired students from around the country participating.

World Around You is a national bi-weekly magazine focusing on the deaf community. The Creative Contest is sponsored annually for hearing impaired teenagers. The students this year entered in four contest categories: Fiction, Non-Fiction, Drawing and Art, and Poetry.

"We added the Drawing and Art Category in response to requests from readers," said *World Around You* editor Cathy Carroll. "Last year, many readers told us they thought it essential that we offer some students a non-verbal challenge."

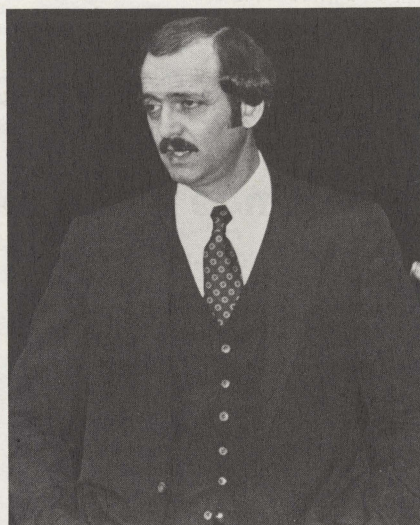

A panel of judges rated the Creative Contest entries, using a one through five point scale. *World Around You* staff totaled up the points from the judges.

"*World Around You's* 1981 Creative Contest proved to be a success," said Robert Davila, vice president for MSSD/KDES. "We hope that many hearing impaired young people continue to enter the contest in the years to come."

At the general session Dr. Ralph Paccinelli from the Region III Rehabilitation Services Administration office spoke on funding trends in rehabilitation and the importance of finding creative solutions to present budget cuts. Dr. Marita Danek, director of the RCD program at Gallaudet, gave the introductions and described the consortium. Ross Lynch, director of the George Washington University program, discussed the future of rehabilitation and Dr. Paul Power, director of the University of Maryland program, provided an overview of rehabilitation education. A representative of the International Year of Disabled Persons, Ms. Kathy Sampecks, described the various community efforts which are planned for IYDP.

The Job Fair provided information to graduate students about job and fieldwork opportunities and brought community agencies into contact with each other and with educators in the area rehabilitation education programs. Assistance with organizing the program was very capably provided by graduate students in the Gallaudet RCD program including Millie Brother, Barbara Bown, Dottie Cobbs, Louis Crume, Dee Jordan, Yvonne Morgan, Susan Draper, Sister Loretta Valdes, Jim Maher, Pam Stine, Rebecca Shearhouse, Rona Siwek, Wayne Trout and David Lawlor.

A Resource Directory which lists area rehabilitation resources, programs and educators was distributed to professionals at the Job Fair. A limited number of directories are still available. Those interested in obtaining a copy should call Marita Danek at x5586.

Dr. Ralph Paccinelli from RSA spoke at the Job Fair.

Tim Robertson, an employee with Technical Support Services, gets ready to move TV sets.

Three Physical Plant employees recently received awards and savings bonds for their service to the College. From left are Wilbert Brinkley, Custodial Services supervisor, with 15 years of service; custodian Bernetha Mack, with 10 years of service; and custodian Willie Green, with 30 years of service. Green will retire this month.

Tate ESL Curriculum to be offered

A two-week intensive training course in the South Pacific Commission Tate ESL (English as a second language) Curriculum will be offered July 6-17, 1981 at MSSD, under the auspices of the Office of Cued Speech Programs. Vice President for MSSD/KDES Robert Davila has indicated that the fee of \$150 for this course will be paid for MSSD and KDES teachers and staff who apply to and are approved by their respective deans, for participation.

Persons other than MSSD and KDES employees should obtain detailed information and/or applications from the Office of Cued Speech Programs, 302 College Hall.

The SPC Tate Curriculum is in use in Aural/Oral, Total Communication and Cued Speech contexts. It will be taught

independently of communication method, though there will be discussion of the constraints put on the curriculum by different communication modes.

The Department of Education has authorized graduate credit for two semester hours for this course.

The course will be taught by Professor George Pittman, who has served as director of post-diploma programs in teaching English as a second language, in the University of Sydney (Australia) and McQuarrie University; and Gaye Nicholls, a doctoral candidate at McGill University, Montreal, Canada. Both have used the curriculum with hearing-impaired children in Australia. Nicholls has also taught the training course on the Tate Curriculum at McGill University.

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff and graduate students. More details on programs of interest can be obtained from Glenn Pfau, Office of Sponsored Research, x5030 (Voice or TDD).

Deadline	Program
06/12/81	NIJ—Informal Control and Crime Prevention
06/23/81	CDC—Health Education for Parents of Deaf Children
06/30/81	NIJ—Adult Criminal Justice Research
07/01/81	NIA—Aging Research: Psychosocial Aspects
07/01/81	NINCDS—Communicative Research
07/01/81	NIHM—Mental Health Service System Research
07/10/81	OHDS—Model Projects on Aging
07/15/81	NSF—Science for Citizens—Forums, Conferences, and Workshops
07/20/81	HHS—Projects of National Significance in Development Disabilities
08/13/81	ED/NIE—Organizational Education Processes

Health education for parents of deaf children

Development and implementation of a comprehensive health education program for parents of deaf children is being sought by the Center for Disease Control in Atlanta, GA. This program includes a language communication component, a common core health attitudes and coping skills component and specific health areas in nutrition, exercise, safety, stress management, immunization, smoking and alcohol and substance abuse.

Eligible applicants must be educational institutions serving deaf children who have residential deaf populations of teenagers and children, residential experts in research on deafness, residential educators/interpreters for the deaf, residential experts in adolescent problems of the deaf, experts in health education for the deaf and experts in evaluation of health education.

This solicitation is similar to a previous one released a few months ago by CDC and then withdrawn.

Gallaudet College, primarily through MSSD, is anticipating preparing a proposal for this solicitation. The proposal effort is being coordinated by Glenn Pfau, director, Office of Sponsored Research. Kendall Green personnel who are interested in the project are encouraged to call Pfau at x5030.

President's Office Notes

Board of Trustees meets on Commencement day

The Gallaudet College Board of Trustees met at MSSD on Monday, May 18 following the 117th Commencement of the College. Members of the Board and their spouses were invited to arrive here in time to see the MSSD spring drama production and to attend the pre-Commencement dinner for honor graduates and honorary degree recipients.

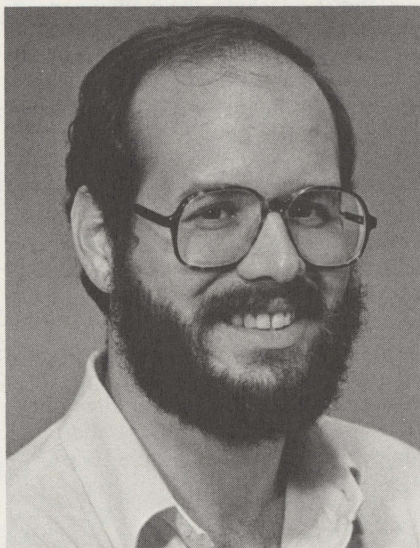

The Board approved the following items as presented in the agenda:

1. FY 1983 Budget.
2. Policy on International Students.
3. Pre-College Compensation System.
4. Authority to Borrow Current Operating Funds for Fiscal Year 1982.
5. Recommendations for Promotion—Division of Academic Affairs.
6. Recommendations for Tenure—Division of Academic Affairs.
7. Recommendations for Tenure—Pre-College.
8. Campus Building Names.

Buildings on campus were named as follows: the Edward Miner Gallaudet Memorial Library was named the Edward Miner Gallaudet Memorial Building, the Auditorium was named the Elstad Auditorium, the Student Union Building and Ely Hall were named the Ely Center, Dorm 5 was named Carlin Residence Hall and the faculty office building was named the West Office Building.

Persons receiving promotions within the Division of Academic Affairs were: John S. Schuchman, from associate to professor; Chandler W. Cowden, from instructor to assistant professor; Ann Davidson, from assistant to associate professor; Charles J. Pearce, from assistant to associate professor; Walter E. Trafton, from assistant to associate professor; Russell Astley, from assistant to associate professor; Agnes V. Padden, from instructor to assistant professor; John V. Van Cleve, from assistant to associate professor; Kathleen B. Oman from associate to professor; Cathy Dickstein, from instructor to assistant professor; Harvey Goodstein, from assistant to associate professor; Herbert G. Mapes, from assistant to associate

professor; Gary F. Seifert, from associate to professor; Eugene R. McVicker, from associate to professor; Michael B. Miller, from associate to professor; John B. Christiansen, from assistant to associate professor; Richard Meisegeier, from associate to professor; Evelyn Wolstein, from assistant to associate professor; David Tweedie, from associate to professor; Edmond J. Skinski, from assistant to professor; Robert R. Davila, from associate to professor; Barbara Johnson, from assistant to associate professor; Marilyn Sass, from instructor to assistant professor; Allen E. Sussman, from associate to professor; Frank Zieziula, from assistant to associate professor; Mynga Futrell, from assistant to associate professor; Martin Noretsky, from instructor to assistant professor; Carolyn Ewoldt, from assistant to associate professor; Pamela Getson, from assistant to associate professor; Michael Karchmer, from associate to professor; Thomas Kluwin, from assistant to associate professor; Glenn Pfau, from associate to professor; and Raymond Trybus, from associate to professor.

Rich Pelletier has been appointed Acting Dean of Students for the 1981-82 school year at MSSD. He will live on the MSSD campus, supervise CSS as well as the residence programs and be eligible to apply for the position on a permanent basis when it is advertised next year. Pelletier will assume his new responsibilities on July 15. He is currently a transitional classroom teacher at MSSD.

Employees of the Physical Education Department gather for a group photo outside Hughes Gym.

Kids' summer program starts soon

The Gallaudet College Children's Summer Program is once again being offered for employees' children ranging in age from five to 12 years.

The program will run from June 22 through July 24, from 8:30-11:50 a.m. It will primarily be held in the Hughes Gymnasium. Cost is \$25 per child.

The program will offer special instruction in swimming, canoeing, tumbling, dance, games, sign language and arts and crafts. There will be field trips to Goddard Space Flight Center and Greenbriar State Park, a C&O Canal Barge Ride, activities such as pony rides and a skit day. Juice and cookies will be served daily.

Children are required to be in the program four out of the five weeks because the program is structured and continuity is important. This year the children will be put into four groups, 25 to each group: five and six-year-olds, seven and eight-year-olds, nine and 10-year-olds, and 11 and 12-year-olds. Only the first 25 applicants for each age group will be accepted, and the whole program will be limited to 100 children.

Applications for the program must be returned no later than Monday, June 8. For more information about the program you can call the Department of Physical Education, x5361.

German visitors come to Gallaudet

A delegation of six German visitors from the Hamburg Association of the Deaf will be at Gallaudet from June 13-July 11 for a special one-month program featuring information about interpreter training and interpreter referral services.

The representatives are educators and social workers who plan to train interpreters and develop interpreter ser-

vices for deaf people in the Hamburg area. Their program will serve as a model for the rest of Germany.

In cooperation with the Department of Sign Communication, the International Center on Deafness is coordinating activities for these visitors. If you would be interested in meeting them, contact the International Center at x5316.

Kendall Yearbook out

1981 Kendall Yearbooks are available for \$1. Call Sandy Hart, x5793, to place an order.

Among Ourselves

Bob Herbold, assistant director of the Computer Center, will be spending the summer at the Lawrence Livermore Laboratory in California, where he will be helping evaluate their graphics package for use by hearing impaired employees. Herbold recently received his MS degree in Computer Science from the University of Maryland.

Marita Danek of the Counseling Department gave a presentation on "Rehabilitation Outcomes and Caseload Management as a Function of Counselor Expertise in Hearing Impairments" at the Fourth Annual Conference of the Eastern Educational Research Association in Philadelphia, PA on March 12. She also presented with Estelle Davis of the University of Maryland "The Consortium Concept in Rehabilitation Education" at the Mid-Atlantic Regional Conference on Rehabilitation held May 7 in Washington.

Louis Townsley, chairman of the German Department, talks with Archives Librarian Corinne Hilton in the Learning Center.

Published each Monday for staff and faculty of Gallaudet College by the Office of Alumni and Public Relations.

Energy tips: keep on conserving

by Jim Hull

The underlying theme "Energy—we can't afford to waste it" was never more true than it is now. The College needs your help in using energy wisely.

Our current fiscal year energy requirements, using known data and estimating needs under normal weather and use conditions, have been calculated. It's no secret—our anticipated expense is greater than our budget by a considerable sum.

Many things have happened since the budget was formulated more than two years ago. Although time-of-day electrical billing and some oil cost increases were forecast, the havoc imposed by OPEC with its price hikes, the Iraq-Iran war and the cut-off of Iranian oil did not appear until much later. You all know the devastating effect on your own utility bills.

Fortunately, PEPCO produces our power with steam boilers that are about 85% coal fired, and cost of power will remain stable unless the coal strike lasts another two months. If this happens, PEPCO will in turn need to buy power from less efficient producers on the power network and pass along the additional costs to its customers.

The College burns fuel oil during the summer to heat water, produce steam for cooling and, in some cases, to humidify the air as well as maintain a comfortable environment in a few of our buildings. Although fuel costs have moderated somewhat, we do burn a considerable quantity during the summer—in the neighborhood of 170,000 gallons between May 1 and

Oct. 1.

Additionally, the Transportation building has been heated and the adjacent parking area lighted—not in our energy planning at the time the budget was prepared.

Each of you can contribute in a small way by keeping windows and doors closed when the air conditioning is on. Those of you who have window units, please turn them off at night and weekends. Where you have a window that opens, open it in the morning for a little fresh air and some "free" cooling, but close it when you start your a/c unit.

You can also help by turning lights off in the office or room of you are the last to leave. Lighting creates heat which in turn has to be overcome by the air conditioning. The less lights are used, the less heat build-up is created.

You do your share when you call maintenance because of a malfunction of equipment, whether in your work area or elsewhere. Don't feel bad about complaining—it's the job of maintenance to keep equipment running efficiently.

Each person on campus is expected to comply with the 78 degree minimum cooling limit. Maintenance and Operations will be striving to maintain this minimum where possible, but must still depend on your cooperation.

Why not join the team today? Our energy budget for FY '81 is \$2,393,317, and if we work together we can make it. Results will be published when all the utility bills are together about Dec. 1.

Thank you for your continued cooperation.

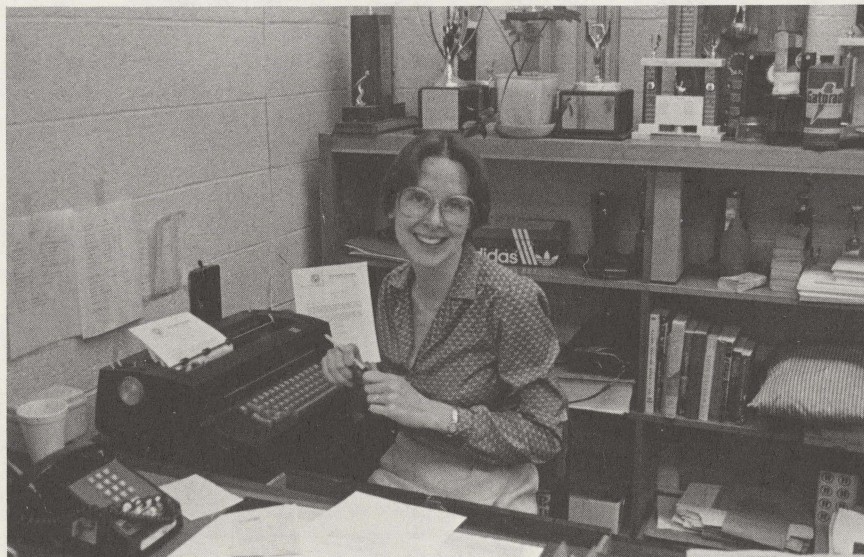

ABC captions more programs

ABC-TV, Channel 7, will be adding four more programs to its closed captioning schedule beginning June 2. New programs to be captioned will be "Fantasy Island," "Taxi," "Laverne and Shirley" and "Hart to Hart."

New TDD

The Education Services Division at the National Air and Space Museum has acquired a TDD to enable hearing impaired individuals to receive information about tours and tour scheduling. The number is (202) 357-2853.

The machine has a 24-hour answering service, and all messages are returned during business hours.

Vicky Cox is a new secretary with the Department of Physical Education.

Changes made in division of Business Affairs

Dr. Jerry Lee, assistant vice president for Business Affairs, will be assuming additional duties in the division as part of a revision in the organization of Business Affairs.

Effective July 1, Lee will be directly responsible for the day-to-day operations of the five departments in the division: administrative, business, fiscal, maintenance and operations, and design and construction. He will also continue to coordinate Gallaudet's legal affairs.

Lee's new responsibilities will give him the same level of approval authority as that of Vice President for Business Affairs Paul Nance. Lee will also be responsible for the budgets of the five departments.

Nance will continue his weekly meetings with Dr. Merrill and preparation of Board agenda items, as well as other responsibilities. In addition, he is developing a lengthy paper on the status of Gallaudet Business Affairs.

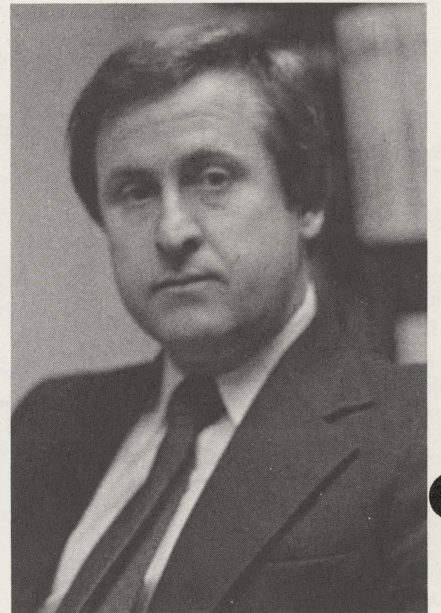

A revised Business Affairs organization chart has been prepared and reviewed by Merrill and the Board of Trustees Committee on Resources. The revisions also include eliminating assistant director titles in the Physical Plant and having the Department of Safety and Security reporting directly to Patricia Potter, director of Administrative Services.

During the coming year, in addition to regular daily activities, Business Affairs will be concentrating on a number of other things. These include cost-effectiveness studies within and outside Business Affairs, based on a concept paper approved by the president and Board; performance standards for each department; adequate level of sign language skills throughout the division; upgrading accounting systems; and refining and implementation of new automated systems.

Pool hours

Swimming Pool hours from June 1 through Aug. 21 are:

Mon.-Fri.	11:30 a.m. - 1:30 p.m. 3:30 p.m. - 5:30 p.m. 6:30 p.m. - 10:00 p.m.
Sat.	12:30 p.m. - 5:30 p.m.
Sun.	1:00 p.m. - 5:00 p.m. 6:30 p.m. - 10:00 p.m.
